

Guidelines for Haemodialysis dialysis code (2A.S1.00214)

All patients visiting the network hospitals for the first time for dialysis should record the history, examination findings and lab investigation along with the advice of the nephrologist for maintenance dialysis of CKD patients in detail and upload in the preauth. In the first preauth raised by the hospitals, maximum of 12 follow up dialysis at the rate of 2 to 3 per week for a period of one month. The next set of dialysis for the following months the hospital should submit with new preauth for 12 dialysis cycles for a period of another month with the latest examination findings including the CBC and serum creatinine and blood urea levels.

Claims can be submitted at the end of month with the post dialysis document showing the weight and the ^{KT/V} value readings which are machine generated in the dialysis machine.
